

NOTICE

PICTON AND WELLINGTON HYDRANT FLUSHING SPRING 2011

Prince Edward County is committed to providing safe and high quality drinking water through maintenance and continual improvement of our treatment and distribution systems.

Hydrant flushing ensures proper flows for firefighting as well as insures a fresh supply to our residents. During hydrant flushing, sediment in the mains can be stirred up briefly causing dirty water. If this occurs please run your tap until it clears. We recommend not doing laundry during this period as it may cause stains on the clothes.

We apologize for any inconvenience this may cause.
