## NEWS RELEASE

### **New County Website Launched**

Picton ON - The County of Prince Edward has launched its new website to improve access to municipal information. The new site combines the previous corporate site and the economic development site into one with a goal of one stop shopping for residents, visitors and businesses.

The new site can be accessed at [www.pecounty.on.ca](http://www.pecounty.on.ca).

The original County websites were created shortly after amalgamation and have grown steadily over the nearly ten years since their development. As well as merging the two sites, this project involved creating a new look which would appeal to current residents as well as visitors and potential investors from around the world. It features simple navigation, enhanced search capabilities and relevant, up-to-date information. The site was built primarily in-house using a multi-departmental team, with art work and design by a local communications firm, Engine Inc., based out of Belleville.

"This has been a large project for our staff, but the end result is well worth the time and effort," said Gayle Frost, Commissioner of Corporate Services and Finance, whose department spearheaded the project. "The new site presents a fresh look and easy access for anyone visiting it and provides us with a better tool for communicating with our public."

The site will continue to be enhanced and expanded throughout the coming months.
